

NORDICLINE MD7

Multideck cabinets

Robust in operation, great in merchandising.

The NordicLine MD7 delivers ecologically sustainable merchandising for retailers.

Reliable in daily operations and efficiency

The NordicLine MD7 is a new member of the Epta multideck family combining high performance with energy and space efficiency. The robust construction and design make it a long term sales tool for any store format. With the integral door design and a new lighting solution groceries are highly visible for shoppers. For the store personnel, the ease of installation, cleaning, replenishment and service deliver efficiency benefits every day. The multideck technical construction is designed based on feedback from food retailers, with no compromise on Epta's requirements for top-class quality and performance.

Reducing energy use with high performance design

Available both in open and door versions, the NordicLine MD7 features a back-wall evaporator delivering secure temperature performance even in the toughest conditions. Naturally, both the door and open versions of the cabinet have Epta's unique patented e-ncore air curtain technology as standard.

The door version of the NordicLine MD7 delivers optimised performance for product temperatures and the highest energy efficiency, even in the toughest conditions. This 3M0 classified door cabinet reduces energy consumption by up to 77% compared to open cabinets during store opening hours. For customers who prefer the open multideck, the NordicLine MD7 is no stranger to high performance and energy efficiency either. It is available in a 3M1 high-performance version or a 3M2 energy-optimised version.

Saving of installation, service and cleaning time During retail store renovation or building time, installation of the NordicLine MD7 is fast and precise. High-quality multiplexing of cabinet lines and the possibility of pre-installed piping considerably shorten the required installation time and work. In daily operations, cleaning and servicing has also been made easier than ever before. All parts necessary for cleaning the cabinet can be removed without tools,

facilitating the use of cabinet. Located at the back wall, the evaporator is protected from possible food spills and dirt. During servicing, the fans and evaporator are easy to access and the fans can be changed in a few minutes if necessary.

More sales with enhanced product visibility

The NordicLine MD7 has an integrated door design maximising product visibility. Transparent doors with anti-reflect coating are available as an option for optimised product visibility. LED lights provide excellent product visibility and energy efficiency. Shelf lighting at the front of the shelves is positioned for optimal visibility.

Modular range for supermarket and hypermarket formats

The NordicLine MD7 delivers a good balance between product display volume and foot print. The multideck range with different size and door alternatives make this the optimum cabinet for larger stores in need of maximum product volume.

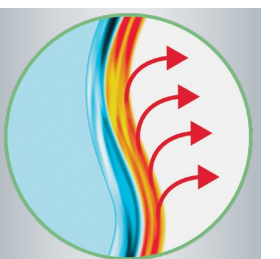

CHOOSE THE NORDICLINE MD7

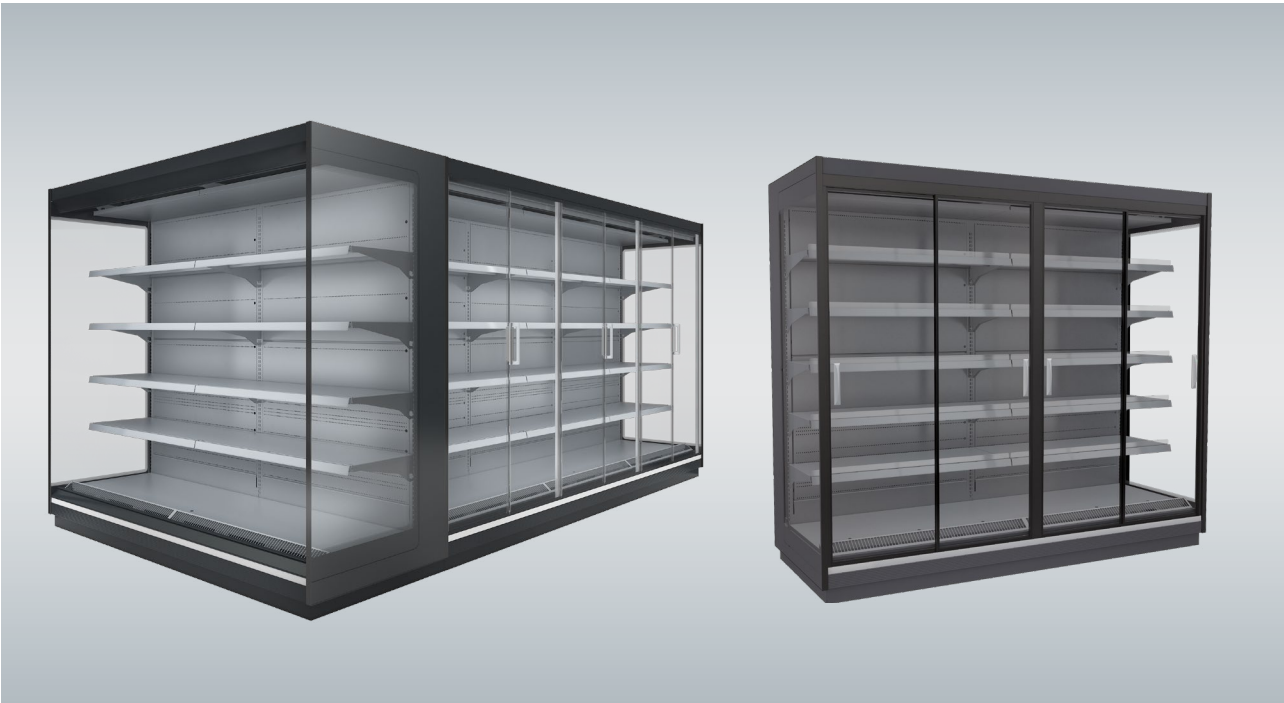

- Maximised product display area with integrated door design
- Excellent product visibility
- Modern design for supermarket and hypermarket store concepts
- Durable construction with high shelf load capacity
- Back wall evaporator multideck with good energy efficiency
- Available in 3M0, 3M1 and 3M2 versions

e-ncore technology minimises the mixing of warm and cold air.
