1. INTRODUCTION

1.1 Scope

The document "Cleaning Instructions" indicates how to clean the refrigerated display cabinet.

Instructions for use are also available on:
www.eptarefrigeration.com.

1.2 General safety information

Do never interrupt the cooling chain of displayed goods.

Before starting any maintenance or cleaning, disconnect the equipment from the electrical power supply and secure against re-connecting by unauthorized persons.

Ensure that the working area is sufficiently illuminated during maintenance and cleaning activities and use an additional lighting source if necessary.

Doors and glass walls are provided with an antifog liner film inside. Do not use any detergent containing abrasive, strongly acidic or caustic substances.

Beware of touching any rotation part of the cabinet (fans) with fingers, towels or other tools.

Do not remove any protective guards and covers.

1.3 Reasons for cleaning

In order to present goods attractively and hygienically, it is important to clean the freezer cabinet regularly. Regular cleaning also prevents mould and harmful bacteria from settling in the furniture, as damp dust provides an ideal breeding ground.

Regular cleaning is also essential for the technical function. This is the only way to ensure that an optimal heat exchange takes place and that air can flow easily in the cabinet.

Cleaning instruction

IT 2. CLEANING AGENTS

FR Work clothes

- Protective gloves
- Protective clothing
- Safety glasses

EN Cleaning agent for surfaces other than glass

- Water
- Mild detergent
- Non-scratching sponges, rags and soft cloths

ES Cleaning agent for glass surfaces

- Water
- Mild detergent
- Standard glass cleaner
- Oil stain removers
- Non-scratching sponges, rags and paper towels

PT The following must not be used

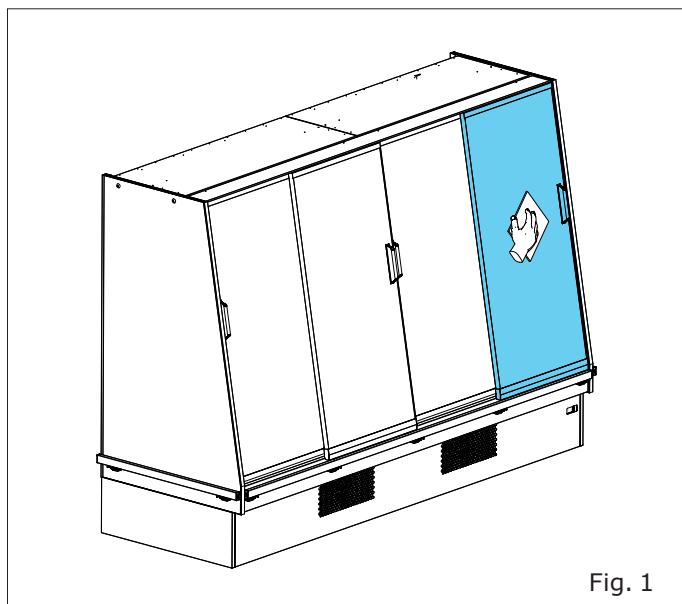

- Strong corrosive cleaning agents
- Acidic or caustic cleaning agents
- Inflammable agents
- Acetone
- Solvent containing cleaning agents
- Abrasive cleaners
- Jet-wash cleaner or other strong water jet to clean

3. CLEANING THE APPLIANCE

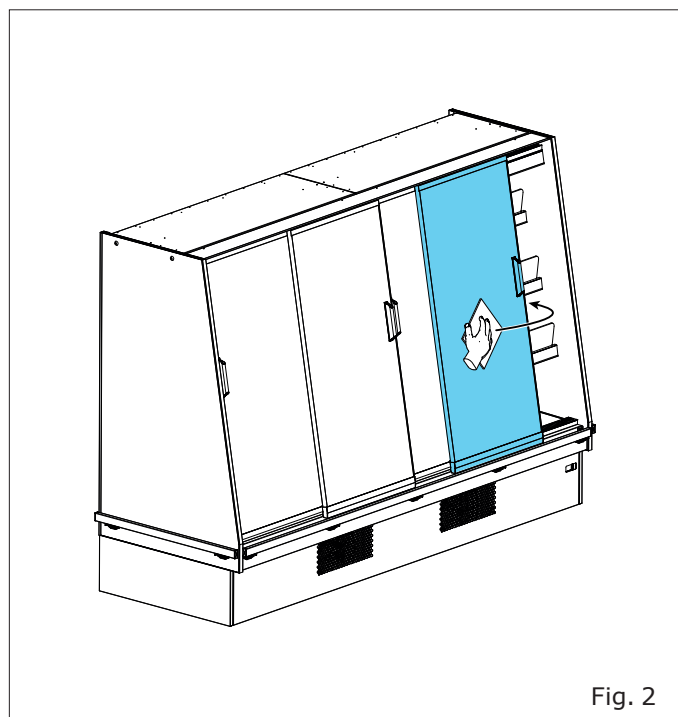

3.1 Cleaning of the refrigerated display cabinet exterior

- Clean the outer surfaces of the display case with mild soap or detergent in lukewarm water only.
- Wipe carefully with non-scratching sponges, rags and soft cloths.

Cleaning of the glass doors and glass walls inside:

- Clean it by using standard glass cleaner with a non-abrasive sponge, a rag or a paper towel.

3.2 Cleaning of the refrigerated display cabinet interior

- Remove the displayed goods and store them into refrigerators or chilled rooms.
- Avoid interrupting the cooling chain.
- Disconnect the cabinet from the electrical power supply and secure against re-connecting by unauthorized persons.

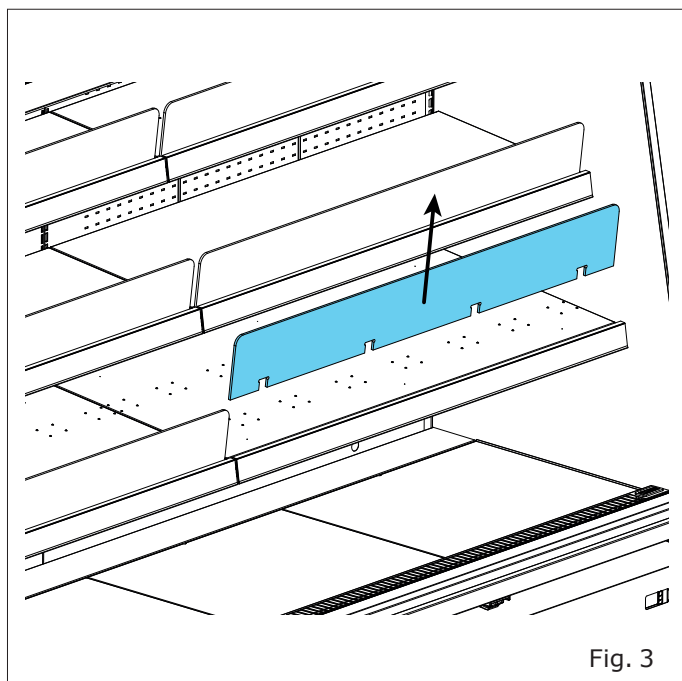

Greasy residue must be removed using oil stain remover.

Cleaning instruction

Cleaning of the shelves:

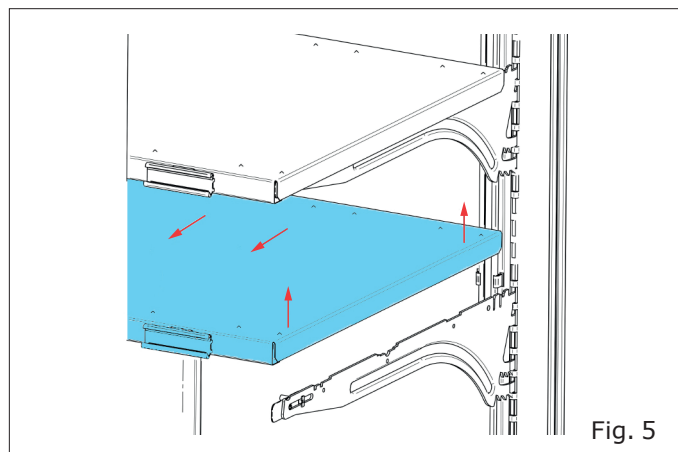

- Remove the frontal glass and clean it.

- The surfaces can be cleaned with mild soap or detergent in lukewarm water.

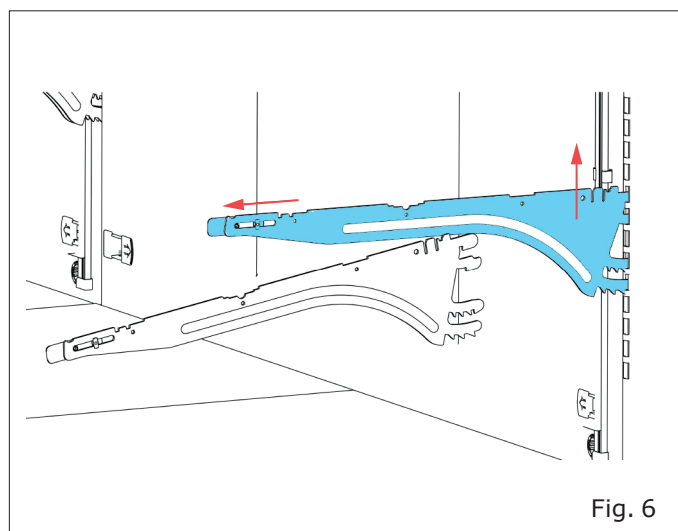

- For convenient cleaning you can detach the shelves and take them off the rack.

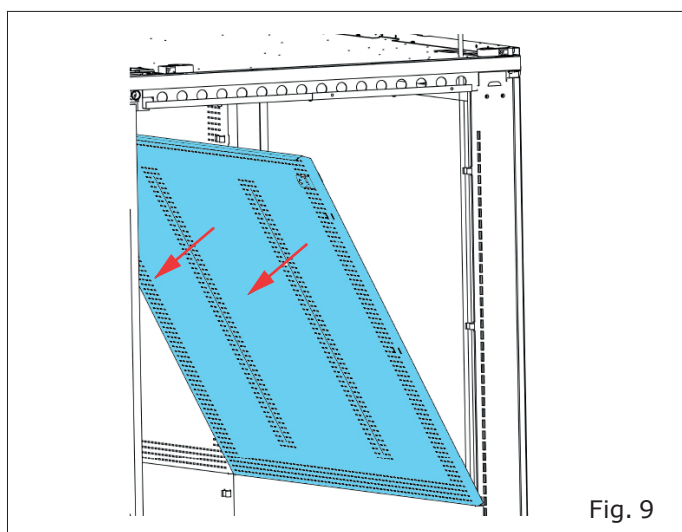

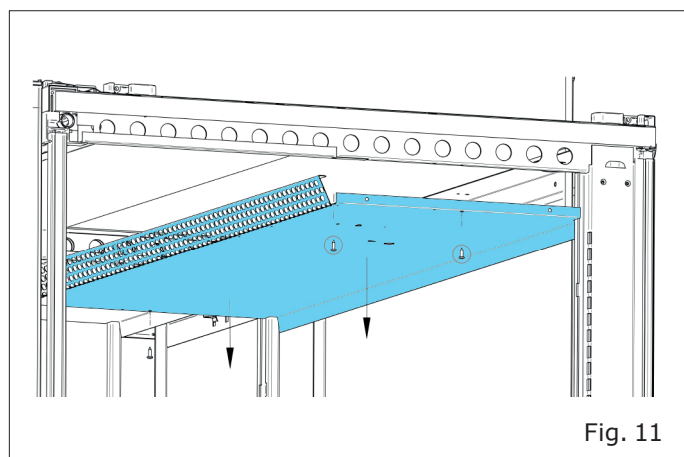

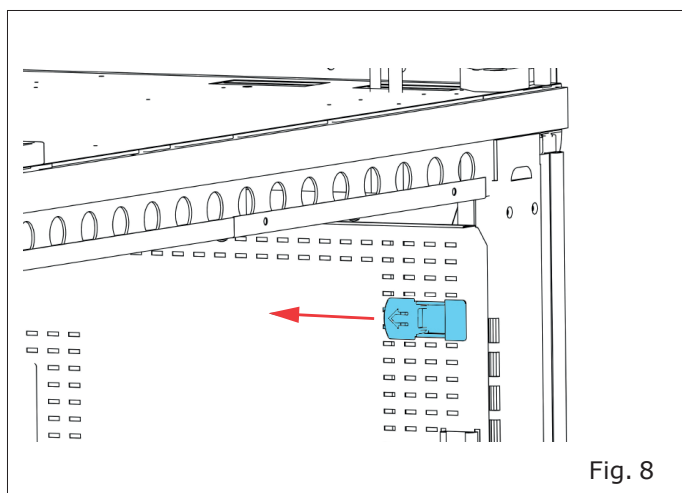

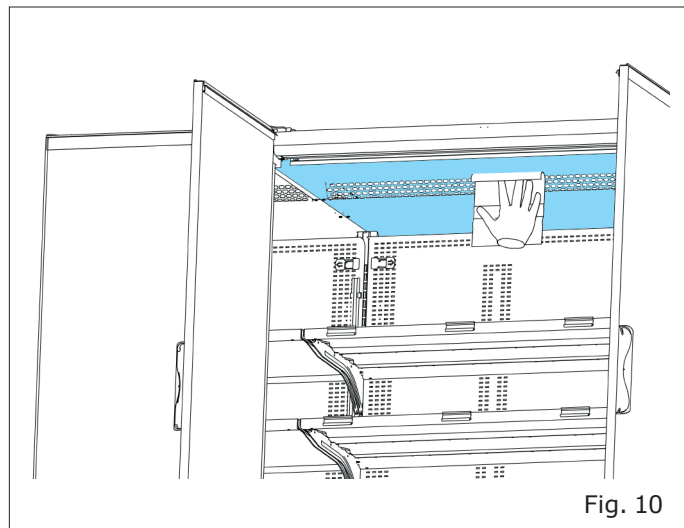

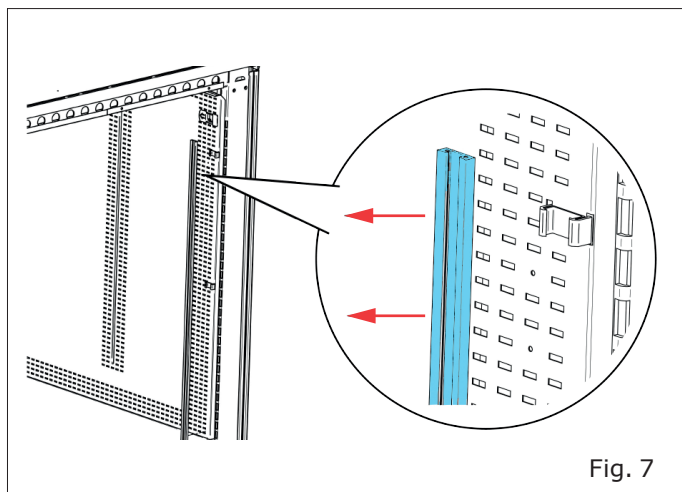

Please rotate the shelf to extract it from the cabinet.

- Make sure that the brackets are in the correct position and that the brackets lock completely into the support when you reattach them.

Cleaning instruction

3.3 Cleaning of the base deck

Cleaning of the base deck must be done by trained personnel only.

- Avoid interrupting the cooling chain.
- Disconnect the cabinet from the electrical power supply and secure against re-connecting by unauthorized persons.
- Remove the air-return grids and clean it by using a moist rag.

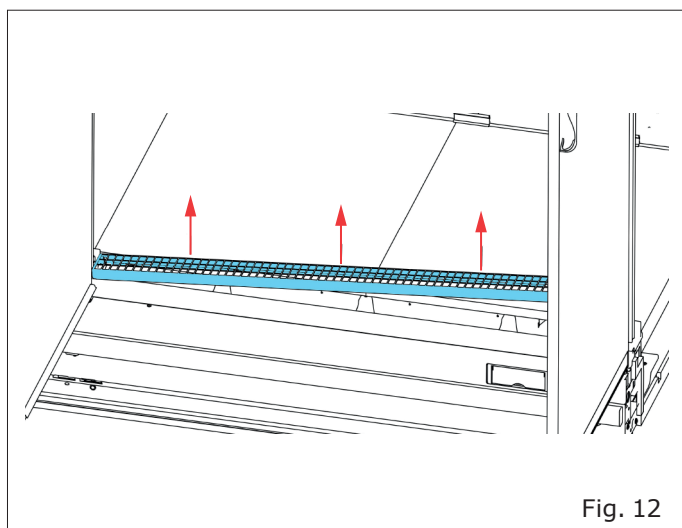

Fig. 12

- Clean the base tray with mild soap or detergent in lukewarm water. Check that the drain is unclogged.

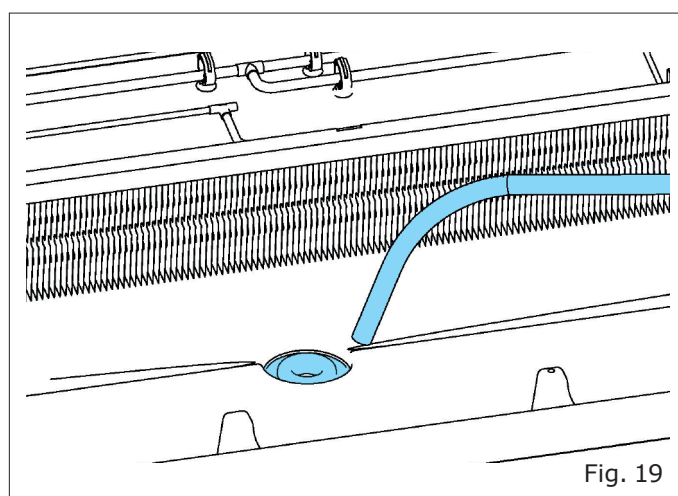

- Vacuum inside the drain using a wet vacuum cleaner to remove any particles.

- Rinse drain with water.

- Clean the drainage opening entirely and rinse running water.

3.5 Cabinet's assembly

Follow the same disassembly phases in the reverse order:

- Reinstall the internal structure and the shelves.
- Make sure that the brackets are in the correct position and that the brackets lock completely into the support when you reattach them.
- Reinstall the base deck.
- Reinstall the air return grid.

3.6 Cabinet restart

- After completing the cleaning and attentively checking that the inside of the cabinet is completely dry, put the appliance back into operation by reconnecting power to the cabinet.
- The cabinet will then start its cooling cycle. Allow cabinets to reach a displayed temperature of -3°C before reloading the removed goods.
