

## Epta launches the GranBering Integral Ultra display refrigerator

**Date:** 15 September 2022

Epta shows its farsightedness and launches the negative GranBering Integral Ultra display refrigerator branded Costan.

A solution which also restores life to the new Soft Discounts, increasingly emblematic of a careful selection and a vast quality assortment, with the contribution of the variety of frozen products.

Epta guarantees important benefits, both in terms of energy efficiency and layout of display space.

The new vertical "plug and play" display refrigerator completely integrated and using R290 propane, as well as standing out for its simplified multiplexing, positions itself in class C, which means best-in-class in accordance with the Energy Labelling regulation.

It is a guarantee of up to 30% energy saving, with the contribution of the new hybrid defrost system and the compressor equipped with inverter.

The led lights, the vast palette of colours available for the interior parts, the seven rows of shelves as well as the number of doors increased from 2 to 5, give the right value to the products. Furthermore, the consumer is given an immersive purchasing experience in the store and an equally tasty and genuine experience at home.
